## Arrowwood Baseball Tournament Won by The Local Club

On Friday last the Arrowwood Baseball Club was crowned victors for the day when they succeeded in downing the Blackie aggregation after nine innings of exciting baseball in the final game of the day. A large crowd of enthusiastic fans assembled early to witness the three visiting teams display their playing ability, and after seeing the day's performance were elated to know that the team representing Arrowwood was just a little better than any of the visiting Clubs.

Many eager fans expected to see the first game a real exciting affair but the Carlsland infielders gave a terrible exhibition of baseball and Blackie players were able to secure an early lead of seven runs which enabled them to coast to an easy victory. Walker, pitching for Blackie, allowed only a few scattered hits and never at any time was he in much difficulty. Orellin, of Strathmore, pitching for Carlsland, found the going plenty troublesome and when the game was ended, the Blackie team was out in front by an 8-2 score.

Carlsland—Woodrow, Field, Gherke, Phillips, Christensen, Crowe, Orellin, Plaxton, Popoff, Blackie—Murray, Malmberg, Evans, Woodridge, Walker, Adamson, Steer, Wellman, Dawson.

Score by Innings:  
Carlsland 0 0 0 0 0 2-2  
Blackie 4 3 0 1 0 0-8

Queenstown and Arrowwood took the field in the second game of the day and in this engagement Fred Miller, the veteran Arrowwood hurler, had the better of the harling argument with Mallett of Queenstown. The Arrowwood support received nearly air-tight support until the last inning, when Queenstown was able to send five players across the plate. From the start of the game the Arrowwood boys aimed to establish an early lead. Hales walked, Sharpe singled, Bowman was safe on an error and McCullough lined a homer out to left field to give Arrowwood a comfortable lead of four runs. Jimmie Rubbelke made the circuit for Queenstown in the second inning, with a long drive to left centre. Archambault, as usual, proved very capable behind the plate, Eleanor Thompson played his usual steady game, Roy Sharpe scored a run every time he came to bat, while Melvin Bowman was hitting consistently.

Queenstown—P. Stall, Soli, Thompson, McLaughlin, Mallet, Rubbelke, L. Stall, White, Laid.

## Officers Elected for Guides and Brownies

A joint meeting of the Mothers of the Guides and Brownies the leaders of both groups and the local committee was called by the President of the committee for the election of officers for another year. The meeting was held at the home of Mrs. Clifford and was called to order by the vice president Mrs. T. T. Williams. After the disposal of a few items of business Mrs. Kemper was asked to take the chair for the election and the following officers were elected:

Pres.—Mrs. H. Brown.  
V. Pres.—Mrs. A. A. Clifford.  
Sec. Treas.—Mrs. A. Ingraham.  
Directors.—Mrs. N. J. Lord and Mrs. J. Hesketh.

Arrowwood—Norton, Hales, Sharpe, Bowman, McCullough, Mackie, Archambault, Miller, Mason.

Score by Innings:  
Arrowwood 4 0 2 0 5 2-13  
Queenstown 0 1 0 3 0 0-8  
Umpire—Dr. E. J. Liesemer.

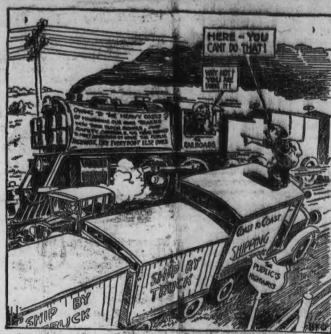

Keyed up to a high pitch and with excitement running high, Blackie and Arrowwood were finalists in the day's fixture. Blackie, fielding their regular steady line-up, won the toss and were able to hold the Arrowwood boys scoreless in the first two innings, while they in turn were scoring three runs. In the third inning, however, the turning point of the game arrived; D. Bowman singled, Sharpe was given a base on balls and McCullough hit his second home

run of the day, to tie the game 3-3. Bowman singled, Mackie grounded out, Archambault singled, stole second and scored on Sperline's hit to give Arrowwood a lead, 5-3. From this time on Arrowwood held the lead but the game was only decided when Jimmy Walker struck out in the ninth inning with Woodridge on third. Archambault made three spectacular catches in left field, Norton gave a credible exhibition the plate for Arrowwood, while Sperline, pitching for the locals, again proved his worth. All the Arrowwood boys played heads-up baseball and each player contributed in no small way to the day's victory.

Same line-up as before.  
Arrowwood 0 0 5 1 0 0 0 1-7  
Blackie 2 1 0 0 2 0 0 1-6  
Umpire—Dr. Liesemer and Beagle.

The dance in the school in the evening brought the day to a fitting close and with Eddie McLean's orchestra supplying the music a large crowd gathered to dance to this popular orchestra.

The ball club wishes to thank the ladies for their loyal support in making the day such a decided success.

FAIR ENOUGH TO TRY

## Milo Notes

This district was blessed with an inch and a quarter of rain precipitation which lasted over 36 hours, extending over Monday and Tuesday morning.

The grasshopper station has quieted down due to the rain.

Mr. and Mrs. C. Sutton, accompanied by L. Larsen, motored to Calgary on Sunday to be on hand for the big circus on Monday.

Mr. James Barry of Lethbridge, was a week-end visitor at the home of Mrs. C. and Mrs. M. Thornton.

Mr. and Mrs. G. Palfrey were business visitors to Blackie last week.

Milo Sewing Circle met on Thursday afternoon, at the home of Mrs. Lawrence Phillips.

The Cully Orchestra sponsored a dance in Larsen's Hall on Saturday evening.

Baptist Church services every Sunday at 11 a.m.

United Church Service held every Sunday at 8 p.m. Sunday School at 7:30 p.m. Choir practice Thursday evening 8:30 at the home of Mrs. A. Ferngrin. All singers are urged to attend.

A birthday party in honor of Russel Mills, 8. Page and Leslie Long was held at the home of Mrs. L. Long on Saturday evening, June 2nd. A good time was reported.

Mrs. A. Ferngrin returned on Thursday from Crossfield where she had been visiting with her daughter, Mrs. G. Niel.

Mr. and Mrs. Scott spent the week-end in Calgary.

United Ladies Aid met on Thursday from Crossfield where she had been visiting with her daughter, Mrs. G. Niel.

Dean Haggen of Milo will operate the Federal Grain Elevator in Queenstown the coming season.

FOR SALE—Singer Portable Electric Sewing Machine \$35 cash. Apply Resource Office.

## A Word to Parents On Cubbing

The Junior Branch of the Boy Scouts Association

Some people have a curious habit of dismissing a thing without giving it really fair thought at all. Not a few parents have forbidden their children to "join the Cubs" for no other reason than that they had not troubled to find out what Cubbing actually means. Had they asked for particulars they would soon have learnt that Cubbing is a wonderful game which appeals to the heart of every healthy boy between the ages of eight and twelve.

There are some folk that get the idea that a little boy is a nuisance, who is always getting into mischief, and needs nothing more than to be fed regularly and canded occasionally in order to "make him a man." This is an old-fashioned idea as much out of date as a Victorian penny. And it is a totally wrong idea too.

"A boy isn't all he seems to be at first sight." He isn't only a little animal with an active body and grinning face. There is something else behind all that which is very shy about and which he doesn't often show to grown-ups. And it is this inside that Cubbing tries to get at and tries to develop. It is his inner life, where he thinks and dreams and makes plans, and uses his imagination generally. Now when he is at school he learns to use his brain and sometimes (that's if he's keen on ordinary games) his body too. A certain amount of his energy is used up this way, but there is still heaps more left. "The boy feels hungry for something or other—he doesn't quite know what."

It is really this "inside" part of him calling out for food; but the sort of food it wants isn't the usual bread and jam variety. It is fun, adventure, romance. If he could only tell you, you would know how much he aches for it. School does not give it to him, and he is made in such a way that he simply must get this fun somehow or other. Perhaps, this hunger may be satisfied for the time being, when he is taken to the "pictures" every day, and so the hunger for adventure comes on again. How is it to be satisfied?

Well, sometimes when daddy is not feeling too tired, he can

(Continued on page 4)

## Arrowwood Notes

Departmental Examinations will commence at the school on Friday June 15th.

The weekly Sunday Stampedes, at North Camp, have commenced.

Mr. and Mrs. J. Mackie and family of Carlsland, spent Friday at the Arrowwood sports.

Mr. and Mrs. G. F. Kemper and daughter, Betty Ann, were visitors to Calgary on Tuesday.

Walter Ward returned last Sunday from West of Turner Valley.

The Community Club is arranging for a lawn social on Friday, July 6th, at the home of Mrs. A. A. Clifford.

We are pleased to report that Mr. R. H. Anderson is expected home from the hospital in Calgary this week.

Mrs. McBride and Jean and Mr. Bob House left on Monday to attend the Jr. U.F.A. Conference in Edmonton.

Miss Ruth Beagle of Queenstown, was a visitor at the home of her parents, Mr. and Mrs. D. J. Beagle, last Friday.

Owing to the rain on Monday, a number of the young people were disappointed in not being able to attend the Barnes Circus in Calgary.

Miss Willie Leith left on Monday for Edmonton, as a delegate from the Arrowwood Gleaners to the Junior Conference Week which is being held at the University this week.

Mr. Sam Duncan and Mrs. J. Miller, of Gleichen, attended the Arrowwood sports last Friday and also visited with their parents, Mr. and Mrs. G. Duncan.

Mr. Norman and Miss Avis Horning motored over from Calgary to attend the Arrowwood sports and spent the week-end at the home of their sister, Mrs. C. Johnson.

Mr. and Mrs. J. R. Shearer and daughter, Norma, and Mr. and Mrs. H. Nowby, of Black Diamond, were week-end visitors in Arrowwood. While here Mr. and Mrs. Shearer and Norma were the guests of Mr. and Mrs. C. G. Taylor and Mr. and Mrs. Newby visited at the home of Mr. and Mrs. R. H. Bishop.

Mrs. A. L. Ingraham was hostess at a social afternoon last Tuesday in honor of Mrs. Verna Ingraham of the Holy Cross Hospital Nursing Staff, etc. It is fun, adventure, romance. If he could only tell you, you would know how much he aches for it. School does not give it to him, and he is made in such a way that he simply must get this fun somehow or other. Perhaps, this hunger may be satisfied for the time being, when he is taken to the "pictures" every day, and so the hunger for adventure comes on again. How is it to be satisfied?

She: We really should have a new car this year.

He: What! When I'm still paying installments on the car I sold in part payment for the car I traded for the car I have now,

## Community Club Will Hold Lawn Social on Friday, July 6

The Arrowwood Community Club held its regular meeting Tuesday afternoon, at the home of Mrs. E. E. Jacques. Twelve members answered roll call. It was decided to hold a lawn social at the home of Mrs. A. A. Clifford on Friday, July 6th.

The program consisted of a piano solo by Mrs. R. H. Bishop, a vocal solo by Norman Jacques and a contest arranged by the Committee. The contest was won by Mrs. Leith.

Mrs. R. H. Bishop and Mrs. F. E. Bell assisted the hostess in serving a dainty lunch.

## District Drenched by Heavy Downpour

Until last Sunday the expression, "It can't rain," was very common here and it really seemed to sum the situation up pretty well, but we don't want to hear that again. We know now it can rain. The sky was overcast with heavy black clouds all day Sunday and late that evening it commenced to rain. It has been raining almost continuously since and according to Mr. Sharland, of the Seale Grain Co., who has an official Rain Gauge, there has been 25 inches of rain.

The rain has saved the district and the people have been quick to show their appreciation by their revived hopes and "already" cheerful outlook. Our greatest fear now is the grasshopper plague but we are of the opinion that if it continues wet this summer that threat will be greatly reduced. Someone has said that hoppers get pneumonia in wet weather, well—here's hoping every hopper gets plural pneumonia—doubled and redoubled.

## TRAIN SCHEDULE AT GLEICHEN

No. 1 Westbound	8.25 p.m.
No. 2 Westbound	8.45 a.m.

## Watch for Further Announcement

## KEEPING UP QUALITY

This reputation of Canadian wheat on the markets of the world is due to the efforts western farmers have made to keep up the quality of their production.

And the reputation of United Grain Growers is similarly based on unerring efforts to keep up its quality of its service to farmers in handling their grain and furnishing them with farm supplies.

DELIVER YOUR GRAIN TO

**UNITED GRAIN GROWERS LTD.**  
Elevators at Arrowwood, Milo, Queenstown, Mossleigh and Shouldice.

## Quality Has No Substitute

## "Fresh from the Gardens"

## Obstacles To International Agreement

Obstacles to international agreement are many and various; so many, so various as to belaud the vision of the conferees and defeat the ends sought. Particularly is this true when a complex of nations is represented round the conference table. Despite the good intentions of conferees, the high sentiments they express and the noble purposes they proclaim, invariably dissonance interrupts the even tenor of the proceedings, divergent points of view protrude themselves and, with each interruption and each protrusion, practical agreement recedes.

The conflict of opinion appears less with regard to the general objective sought, as with regard to the methods by which that objective can be reached. In the ultimate analysis, political rather than practical issues prove the stumbling block.

These thoughts are occasioned by the succession of disasters which has befallen world conferences held for perfectly laudable purposes during recent months. The League of Nations itself, perhaps the greatest agency for world co-operation yet devised, has suffered considerable loss of prestige through recurrent manifestations of local interest, local jealousies, pride and susceptibilities. In matters such as the drug traffic, in which public rather than political and national considerations are paramount, the League has been able to take decisive action and render invaluable service. But where political and national interests and prejudices are involved, directly or indirectly, its decisions have been of less unanimous acceptance. In fact, they have seldom been effective because they have been largely ignored.

In spite of the League and the large body of opinion supporting it, where matters of national significance have been broached, the nations involved have proved a law unto themselves, using the simple expedient of withdrawal from the League as a means of asserting their right to go their own way. Disarmament questions have brought prominently into the foreground this conflict of national viewpoints, and this insensate desire for autonomy in matters affecting the peace of the world. There can be little question that world opinion, generally, favors disarmament on a sane and safe basis. It is equally true, however, that there is sharp clash of opinion as to what the basis should be, and as to the methods whereby it should be undertaken. World disarmament conferences have proved futile for this reason. World disarmament conferences have proved futile for this reason. World disarmament conferences have proved futile for this reason.

Strange as it may seem, while world conferences on the question are disheartening failures, the same can not be said with respect to understanding on the subject between particular nations. Bilateral disarmament agreements appear easy, by comparison. Where two or three nations are involved, amicable solutions come readily to hand. Britain, for example, has little difficulty in reaching understanding with Italy, Italy with France, and so on. Even with Germany amicable negotiations are possible. Yet, when Britain, Italy and France sit around a conference table with Germany, it becomes unmitigatedly impossible to focus all eyes on the same objective and on the same means of achieving that objective.

This is not to say that Germany is entirely at fault, or that the blame attaches to any particular one of the parties to the conference. It is apparently due to the complications which arise with every addition to the conference. Compromise as between nation and nation is easy; between three nations it is a little more difficult, but less difficult than when four nations are involved. Perhaps then, the real solution is to be found in multiplying bilateral disarmament agreements until the whole world is involved and all the nations are committed to peace.

The same course may be found the ultimate solvent of the world without problem. Apparently, the London Wheat Agreement has foundered on the shoals of national aspiration for, as this is written, the Argentine has virtually negated the good work accomplished in the London conference, and the United States, in reprisal, is threatening unlimited production and the dumping of its surplus on the markets of the world.

The London conference resulted in what has been acclaimed as a unanimous agreement regarding the first really co-operative arrangement yet reached by the nations of the world. It was not, however, a flimsy thing, in itself. It left certain important decisions for later consideration, particularly the matter of minimum prices. When two or three nations are involved, prices in accordance with the terms of the agreement, only to be met by objections from the Argentine and demands from that country for an increase of 40,000,000 bushels in her quota allotment. Having already virtually exhausted her quota in the year ending in the London agreement, the Argentine demanded an additional 40,000,000 which could only be given at the expense of other great exporting countries, including Canada. The price conference, however, reached certain tentative conclusions which were submitted to the governments involved.

The next stage in the proceedings was the London conference on prices to amend or ratify the decisions of the Rome discussions. Here again, clash of national interests proved a handicap. Doubts have been raised whether or not pricing by a central body is a sound policy to adopt. In fact, British grain men have been emphatic and outspoken on the subject. The head of the London grain exchange had no hesitation in stating that the representatives of the various nations were amiable gentlemen "but they knew very little about wheat." With warnings against pricing demands for increased quotas, and threats of unlimited production, the whole agreement appears in jeopardy. Obviously, the complexity of national interests is accentuated as large as wheat, as the London agreement. Perhaps (he it repeated) the solution may be found in a series of bi-lateral agreements involving all interested parties.

## Used Sign Language

Sign language was used by members of the Western Canada Association of the Deaf as the medium of presentation at a unique concert at the Blackstone. A short play, given by school pupils, depicted early education of the deaf in this country. In addition, "O Canada" was rendered to the sign language.

## Phoned For Dinner Guests

Guests at a telephone service dinner at Grosvenor House were able to talk to friends at the other end of the dining hall without leaving their seats, telephones being installed on the tables for this purpose.

Ordinary printers' ink is used in making fingerprints.

Health For Young Girls  
Happiness For Tired Women

Thousands of women become tired out and run down, become thin and pale, and profound weakness makes life a burden.

The whole outlook of life is changed when the nervous, sick headaches, the sleeplessness, the spells of dizziness, loss of appetite and discouragement, and the tired, languid feelings disappear with the use of Milbren's Health Nerve Pills. They tone up the nerves, enrich the blood, and bring the health back to normal again.

## "Britain Of The East"

Story of Japan's Progress and Development Reads Like Romance  
Whatever may be said of the aggressiveness of Japan in the Orient, it must be acknowledged that she deserves the designation, "the Britain of the East." Never in the history of the world has any of the backward nations made such gigantic strides forward in the path of civilization as has Japan.

The story of her progress and development reads like a romance. From the very time when she reformed her government and established democratic institutions, the has gone forward in the path of educational and scientific progress and in industrial development at a remarkable rate. Her educational and scientific institutions are among the finest in the world. Moreover, her army and navy have reached a stage of development that is second to no other country. Hence, Japan is a nation perfectly equipped from a technical and scientific point of view that her competition may well be feared by other nations. To make light of her industrial development shows a lack of appreciation of the remarkable progress she has made.—Brantford Examiner.

DEPRESSED BY  
ACUTE ACIDITY

There can surely be no doubt about the effectiveness of a remedy for acidity that can give such permanent relief as this woman's case.—"I suffered for many years from acidity in various forms," she writes, "but it became so bad that every morning I woke with a gnawing pain and a great depression of spirits. I tried many remedies, but the effect was magical. The pain disappeared, and I felt like a new woman. I have taken the daily dose of Kruschen ever since. That was about five years ago, and the Kruschen does not lose its effect."—(U.S.A.) E. E. Kruschen.

Kruschen is so effective with regard to acidity that it has been taken all the torment out of it, and gently expels it from the system. And by stimulating the system, it stimulates to perfect regular action. Kruschen will prevent this harmful acid from even accumulating again. So that your experience no more misery after meals.

Canada's Metal Industry  
Dominion Dominates World States  
President Of Mining Institute

Within 20 years Canada's metal industry has grown by leaps and bounds that it was possible to-day for the Dominion to produce practically all the copper, most of the lead and zinc and all of the silver needed in the Empire, S. G. Blaylock, president of the Canadian Institute of mining and metallurgy, stated.

He was addressing a complimentary banquet given to him by the Grand Furrows of Trade in connection with the convention of the Associated Boards of Trade of Eastern British Columbia.

Canada dominates the world in copper, lead and zinc, and Mr. Blaylock.

Mr. Blaylock thought there was a likelihood of the price of lead dropping for years to come. As a metal producer, the Consolidated Mining and Smelting Company of Trail, of which he is vice-president and general manager, was not concerned with the 10 per cent. tax on gold, Nickel, lead, copper and zinc produced by only two grades of pay millions in taxes on these metals if the price was 75 per cent. over the normal price of 20 years, he stated.

Japan Buying Scrap Iron  
Recent Cargo From Australia  
Closes Market For Scrap

Japan has been picking up scrap iron all over the world, and one of the most varied cargoes of this kind arrived the other day from Australia. There were steel rails red with rust, old sewing machines, and automobile fenders. On the top of one heap was a battered trombone. Scores of old drums ranged aside by side with piles of worn-out machinery, car wheels, cooking stoves, and other ancient and apparently useless articles, together with hundreds of thousands of old horseshoes. Even obsolete cannon were in the cargo.

## A Good Definition

Crooning? Here is a college professor's illuminating definition of it: "An exaggerated and distorted expression of emotional feeling, a kind of semi-musical note that is emitted from the throat and attracts the attention of persons because it is something new. Only people of low intelligence like it." It was described thus by Dean John Patton Marshall of Boston University College of Music.

## Wants Room For Expansion

Musnelli Expresses Need For Italy To Seek Room In Africa And Asia

Geographic and historic reasons were given by Mussolini as an interview with Hector Bywater, editor of the "Daily Telegraph" in Rome, for the expansion of Italian power in Africa and Asia, and the need for a strong navy.

During the interview, Mussolini said: "Thirty provincial capitals are situated on the coast. Rome herself is near the sea. Geography is one of the immutable factors that determine the destinies of a nation."

Then he went on to say: "Geography and history both warrant us in taking Asia and Africa as objectives. We are near to those two continents than any of the greater powers. There is no need for us to make any mistake the meaning of our task. We are not thinking of any territorial conquest, but everyone should know that the undertaking of a natural expansion allowing us to co-operate with the nations of Africa and the Far East."

Mussolini then turned to the problems of the League of Nations and of disarmament, saying: "The principle of the reform of the League of Nations, which is almost universally accepted, is clear. The reforms that are being considered should only be undertaken after the closing of the disarmament conference, because if this conference fails, there will be no need to make any reforms. It will be enough to consider the work of the League of Nations as ended."

It is generally considered that the conference will fail, at least as regards the most important objectives. The greatest armed powers will not disarm; those that are not armed will be in a position to arm with a more or less defensive purpose."

Paris Hotels Face Ruin  
Taxes Heavy And American Tourist Business Falling Off

Instead of opening the customary new extensions as the tourist season starts, one leading Paris hotel, the Plaza-Athene, already has closed its doors, and numerous others are on the verge of doing likewise.

Hotel managers blamed two factors for their plight. First, that the average of one-third of all rooms taken in must be set to the state in the form of taxes. Secondly, that the American tourist business has almost evaporated.

"If this continues for a short time more we'll have to close up, too," the director of a leading hotel in the Etoile district declared.

Here are a few of the hotel taxes: One per cent. of every penny collected as a luxury tax.

Four per cent. of all room bills as a city tax.

A 10 per cent. insurance tax.

A tax for apprentices.

A tax for mutilated soldiers.

A tax for operation.

A property tax.

This totals from 25 to 50 per cent. of receipts.

## New School Readers

Uniform Standard To Be Adopted By Four Western Provinces

A new standard of school readers has been adopted by representatives of the four western provinces to be used in the public schools. These representatives have been meeting from time to time for the past two years judging the contents of the books. The seven books in the new series are to be known as "High-roads to Reading." The books will be adopted as school readers for the fall term of 1935. They will be uniform in style and will be admirably bound and will have colored illustrations. The printing will be done in Toronto.

## The Fox-tail Tie is a Striking Look

It is also known as the "desert cadastre" on account of its long strap-shaped leaves and tall spikes of flowers like a column or a sand.

## "Blue" Spells

Reduce some women to the painful shadow of their own smiling selves. Others take the Vegetable Compound when they are "blue" coming on. It remedies quivering nerves, helps to restore the general health, and drives more pep — more charm.

## PLUG SMOKING TOBACCO

## Radio Signals For Aviators

Ingenuous Device Will Keep Fliers In Mind

A device for visually interpreting signals of aeronautical radio range beacons has been developed by W. E. Jackson and L. M. Harding, radio engineers of the U.S. commerce department's aeronautics branch, according to Rex Martin, assistant director of aeronautics.

Signals, Martin explained, are received through headphones by aviators while upon them, guiding them during periods of poor visibility. The device features an indicator which, fitted in the instrument panel, is similar to the contrivance used for blind landings. It is open-faced and has two needles—one vertical and one horizontal. The vertical needle, Martin explained, is chief indicator and when an aeroplane leaves the course defined by a radio beacon, this needle will move accordingly. However, he added, if the aeroplane is exactly on course, the vertical pointer will remain in centre of the dial.

The horizontal indicator, the official revealed, shows the volume of received signals, which the pilots may adjust as he sees fit.

## Egg Trade Responsibility

Responsibility As To Eggs Below Grade Placed On Seller

In case of dispute about properly marked eggs, or graded eggs, the Canadian egg regulations are quite explicit. No case or container of eggs is considered to be properly marked if, upon examination by an inspector, the case is found to contain more than an average of 6 1/2 per cent. below grade, apart from breakage. In transactions between wholesaler, or between a wholesaler and a retailer, any complaints by the purchaser with respect to eggs below grade must be made to the seller within 36 hours of the receipt of the eggs. This responsibility as to eggs below grade is upon the person in whose possession such eggs are found.

## For Civil Servants

Want Temporary Employees Brought Under Civil Service Act

Representations on behalf of various classes of civil servants were made by V. C. Phelan, president of the Civil Service Federation of Canada, before the common civil service committee.

Mr. Phelan asked that 316 long temporary employees in various government departments who had been eligible for permanent appointment prior to 1927, but through negligence or some other cause were not appointed, now be brought under the Civil Service Act.

## Public School Education

Public school education in Canada costs \$63.68 per year per pupil, according to the report published by the Canadian government. The report shows the total expenditure is about \$165,000,000 a year. In 1932 there were 86,616 teachers, 2,262,116 pupils in the Canadian school system.

## Increased Payrolls

Movement In British Columbia To Improve Working Conditions

Payrolls in British Columbia have been increased by approximately \$200,000 per month since the provincial department of labor started its drive through the board of industrial relations and other agencies to improve working conditions within the province. Hon. George S. Pearson, minister of labor, has estimated.

In the sawmill industry alone, the advance was about \$85,000 a month, he said. The aim of the board is to raise the minimum wage scales as high as could be paid by the industries affected, but not so high they would be forced to stop operations. As conditions improved within a particular occupation, the level could be raised if necessary.

## Trying To Find Secret

Manufacturers Seek Buddha Method Of Producing Stainless Steel

To study four columns which have stood for 2,000 years without showing a sign of decay or dust, a body of European steel manufacturers are visiting India. They hope to learn how people of those days produced stainless steel. The columns were erected by Asoka, the great Buddhist emperor, in four districts of his Indian Empire. Each stands on a high rock and is inscribed with the laws of Asoka's reign. Through the centuries earthquakes have not shaken them and storm has not rusted them. The secret of their making is believed to rest with descendants of the makers, and the steel manufacturers hope to learn this.

## Soybeans Profitable

The Farmers' Advocate says many livestock men, and dairymen particularly, are finding soybeans a profitable crop to grow. The beans add to the protein content of the meal mixture and for hay they are both productive and palatable.

CHILDREN'S CONSTIPATION  
Ended!

Mr. H. T. Rowan, Athens, Ont., writes: "My baby boy was troubled with constipation. I gave him Baby's Own Tablets as directed. Before I had given him the first box the constipation was ended. By relieving constipation, Baby's Own Tablets prevent more serious ailments developing. Much easier to take than laxative tablets and perfectly safe for all little folks from the babe to children of school age. 25c package."

## Most Especially Conducted

The Captain and the crew, the ship's Doctor, and more particularly the kindly, motherly stewardesses of the Canadian Pacific liner Montclair all shared the responsibility of personally conducting the recent trans-Atlantic journey of Mary Estella Barr, of Halifax. Mary Estella has six months of very active life behind her, and the best wishes of the Montclair's personnel for many happy years to come. The journey was necessary because Mary Estella is motherless, and her father, Peter Barr of Halifax, though unwilling to part with his baby daughter, yielded to the wishes of his parents in Keith, Scotland, to send the baby to them. Her grandparents met her at Glasgow.

## A Word to Parents On Cubbing

(Continued from page 1)

tell his small son tales in front of the fire—all sorts of lovely tales about robbers and pirates, and cowboys. And the chap will listen with his eyes wide open, as though he were living in a dream world of his own. But suppose daddy, and mummy too, are both too tired at the end of the day to play with him? Then promptly he gets into mischief. Why? Simply because there's far more adventure and fun in doing something, however naughty, than in being "seen and not heard."

But training the Cub to be useful and sturdy is not the only part of our system. There is an even more important part, and that is that the Cub is taught to realize that the one big sin is selfishness. He promises to do "good turns" daily, and to help others whenever possible. He loves to think he is the successor of the olden knights who went about doing good.

like all "good little boys." In other words, if you do not find him adventurous, he will just make it for himself. And then you think him naughty and give him an occasional whipping! Do you really think that makes any difference to him? This tremendous hunger, inside him has got to be satisfied somehow, and whipping only makes matters worse.

That's just where Cubbing in to help the parents. It is based on the fact I have already spoken about, that the physical hunger is not the only one a child feels. It is the only one he can tell you about; that's why the rest gets forgotten.

In Cubbing, all the extra energy of the boy is used up in fun, in games, in listening and acting, exciting tales and so on. He learns how to be useful, to do various jobs so that when he gets home he will be able to do "good turns" to help mother. A real change comes over him, anybody else can see it. Many times we are told the same thing, that after a boy has been a Cub he really doesn't seem so naughty as his parents first thought him to be. You see, the school work does not really help the boy's character to grow; it only develops the side of him. Cubbing is the rest.

But training the Cub to be useful and sturdy is not the only part of our system. There is an even more important part, and that is that the Cub is taught to realize that the one big sin is selfishness. He promises to do "good turns" daily, and to help others whenever possible. He loves to think he is the successor of the olden knights who went about doing good.

## New Road Map

The 1934 road map of Alberta was recently issued by the provincial government. The map shows paved, gravelled, earth, and local roads in the province from the international boundary to Fort McMurray in the north.

On the back of the map is printed information on Alberta lake and summer resorts, national parks, hotels and auto camps, historic sites, natural resources, fishing, bird game, and other information for the tourist. The map may be obtained at news stands, hotels or from motor associations.

## C. G. I. T. Camp.

July 11-19, 1934

A girls' camp will be held at the Bow River, Arrowwood, from July 11-19, 1934.

Any girl between the ages of twelve and eighteen may attend by registering with Mrs. Mackie or with the registrar in their district. The fee for each girl is \$4.00, \$1.00 of which is to be supplied with application.

It is expected that girls from Brant, Vulcan, Blackie, Champion, Carmangay, and perhaps other points, will be present. Attention is drawn to the fact that girls whether active or not at C.G.I.T. work at the present time, may attend this camp.

"Once you have been a camper, something has come to stay. Deep in your heart forever. Which nothing can take away."

## Church of the Brethren Note

Next Sunday is Children's Day at the Church of the Brethren. The program by the children will follow the Sunday School hour.

The service in the evening will be in charge of Mrs. Wicand.

## Here and There

The British Columbia Chapter of the I. O. D. held its "Com. C. of age" meeting at the Empress Hotel, Victoria, recently, at the first annual convention. Twenty female welcomed delegates from all over the province, many distinguished guests were present.

The annual reduction in cost of summer railway travel under the heading of low summer fares will be put into effect by the Canadian Pacific Railway on May 15th next, according to official announcement. The reduced fares will have extensive limits and stopovers.

Port Hope, on the south bank of the Fraser River, ninety miles from Vancouver by the Canadian Pacific, is a place where the almighty has most lavishly set down in a land of wonderful beauty rivers and lakes abounding in game fish, writes B. Stone, manager, editor of Western Pacific.

Frank M. D. Buchanan, leader of the Oxford Group movement, is expected to launch another campaign in western Canada this spring commencing at Winnipeg May 1, taking in Regina, Saskatoon, Calgary, Edmonton, Vancouver and Victoria, and terminating with a selective phrase party at the Banff Springs Hotel early in June.

The success of low cost all-summer travel on Canadian Pacific Railway last summer has prompted the company to repeat these rates, five and six-day trips during the summer season. Each trip affords 126 miles of motor-land and can be either round-trip from Banff, Alberta, or west-bound from Banff, Alberta, at the convenience of passengers. A. C. Leighton, B.C. representative of the government art, says at Calgary, who will make the summer hold the summer art for selected students from the Province of Alberta at the Kananaskis Dene Ranch, near Banff, has given a location surrounded by the most magnificent of Rocky Mountain scenery.

The skunk is not the king of the woods, said Geo. Corran, naturalist, addressing the Kiwanis Club at the Royal York Hotel recently. "Hold him up by his tail," said Mr. Corran, "and he will become innocuous. He didn't tell the Kiwanis if he had actually accomplished this feat."

Toronto got its full measure of winter-makers lately when the most famous bandmasters of the continent assembled at the Royal York Hotel for their annual convention. Captain Charles O'Neill was the president and they came from all parts of the United States and Canada.

Figures from the Dominion Bureau of Statistics draw attention to the safety of railway travel in Canada. In collision only two fatalities occurred among a total of more than 21 million passengers. Passengers injured numbered only 339. Other fatalities bringing the total up to seven were due to such causes as falling from trains or in getting on or off trains. The figures are for the year to March 31, 1933.

Striking success of the recent coach travel plan inaugurated last May and June by Canadian railway, providing full facilities for trans-Canada excursions, has been the justification of its repetition on the same scale during September. C. P. Fiddell, chairman, Canadian Passenger Association, announced: "Two great times of travel will again be set in motion, one from the west to the east and the other from the east to the west."

Starting with the commencement of the round trip from Southampton at the end of August, the Empress of Britain for the following twelve weeks will be engaged upon what amounts to a continuous voyage of 40,339 miles. In the course of this voyage the ship will spend a total of eighty days actually under way."

**Needed Moisture Here**  
The rain that began falling Sunday night and has continued almost without cessation since, has put a new hope into the people of this district. It is now felt that if the grasshopper pest can be controlled and with additional rains, a fair crop can be looked for.

**"The Quality Car" -- "Today's Best Buy"**  
A V-8 engine, the type of motor that holds all the world records.  
Down shaft dual carburetor, with dual intake manifold, giving more miles per gallon—proven by test runs.  
More body room for the wheel base—body base vs wheel base.  
Durable strength X frame construction, saves body rattle and squeaks.  
All-steel one-piece construction body—strength and durability.  
Floating axle, saddle mounted driving pinion and torque tube drive, features found in the high priced cars only. These are only a few of the hundred reasons why you should consider the **FORD** for your next car. An inquiry will reveal more of the unseen values found in New Ford V-8.

Voice (on phone): Is the doctor in?  
Maid: No Sir, and I don't know how long he will be. He was called out on an emergency case.
